

Aphasia is a language disorder caused by damage to parts of the brain that control speech and understanding of language.

We are offering a community event to learn about stroke and aphasia.

Including:

-Effective communication strategies

-Personal experiences from individuals and their family and friends

- Local and online resources

For more information, contact Judy Ball at the Speech-Language Institute at 630-743-4652 or jball@midwestern.edu.
